

Precor® 2625

Premise Spray

KILLS: Fleas, Ticks, Bed Bugs, Argentine Ants, Asian Lady Beetles, Carpenter Ants, Cockroaches, Crickets, Fire Ants, Spiders Plus Other Listed Pests.

FOR USE IN: Buildings and Structures Including Residential Homes, Apartments, Garages, Kennels, Non-Food/Feed Areas of Hotels, Motels, Commercial, Industrial, or Office Buildings. Also on Pet Bedding, Furniture and Other Inanimate Objects Infested with Fleas.

SPECIMEN LABEL

ACTIVE INGREDIENTS:

Etofenprox (CAS #80844-07-1)	1.00%
Tetramethrin (CAS #7696-12-0).....	0.25%
Pyrethrins (CAS #8003-34-7)	0.15%
Piperonyl Butoxide* (CAS #51-03-6).....	1.50%
S-Methoprene (CAS #65733-16-6)	0.09%

OTHER INGREDIENTS:** 97.01%

TOTAL: 100.0%

* (butylcarbityl)(6-propylpiperonyl) ether and related compounds
 ** Contains petroleum distillates

KEEP OUT OF REACH OF CHILDREN
 See Additional Precautions

EPA Reg. No. 89459-12

EPA Est. No. (J)11623-GA-2 (N)33595-MO-4

Circled letter in front of the EPA Est No. corresponds to the first letter in lot number on bottom of container.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

Contains Petroleum Distillate. Harmful if swallowed. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Repeated exposure to etofenprox can cause skin irritation.

FIRST AID

IF SWALLOWED	<ul style="list-style-type: none"> • Immediately call a poison control center or doctor. • Do not induce vomiting unless told to do so by a poison control center or doctor. • Do not give any liquid to the person. • Do not give anything by mouth to an unconscious person.
---------------------	---

Note to Physician: Contains petroleum distillates. Vomiting may cause aspiration pneumonia.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For additional information on this product, (including health concerns, medical emergencies or pesticide incidents), you may also call 1-800-248-7763, 24 hours per day, 7 days per week.

Personal Protective Equipment (PPE): Applicators must wear:

- Long-sleeve shirt, • Long pants, • Shoes and socks

User Safety Recommendations: User should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. User should remove PPE immediately after handling this product. Wash outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS: This product is toxic to aquatic organisms, including fish and invertebrates. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. This product may contaminate water through runoff. This product has a potential for runoff for several weeks after application. Poorly draining soils and soils with shallow water tables are more prone to produce runoff that contains this product. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinsate.

This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds while bees are foraging the area.

PHYSICAL OR CHEMICAL HAZARDS: Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130° F may cause bursting.

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THE ENTIRE LABEL PRIOR TO USE. USE STRICTLY IN ACCORDANCE WITH ALL USE RESTRICTIONS AND DIRECTIONS.

USE RESTRICTIONS

- Remove pets, birds and cover aquariums before spraying.
 - Do not enter or allow others to enter until sprays have dried.
 - Do not wet treated articles to the point of runoff.
 - Do not use treated articles until sprays have dried.
 - Do not apply this product in a way that will contact workers or other persons either directly or through drift. Only protected handlers may be in the area during application.
 - Do not apply when food is present.
 - Do not use in food areas of food handling establishments, restaurants, or other areas where food is commercially prepared or processed. Do not use in serving areas while food is exposed or facility is in operation. Serving areas are areas where prepared foods are served, such as dining rooms, but excluding areas where foods may be prepared or held. In the home, all food processing surfaces and utensils should be covered during treatment or thoroughly washed before use. Exposed food should be covered or removed.
 - Do not use in dairy barns.
 - Do not use in aircraft cabins.
 - Do not apply directly to impervious horizontal surfaces such as sidewalks, driveways, and patios except as a spot or crack and crevice treatment. During application, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters, or surface waters.
 - Do not make applications during rain.
- All outdoor applications, if permitted elsewhere on this label, must be limited to spot or crack and crevice and void treatments only, except for the following permitted uses, if allowed elsewhere on this label:
- 1) Applications to the side of a building, up to a maximum height of 3 feet above grade
 - 2) Applications to underside of eaves, soffits, doors, or windows permanently protected from rainfall by a covering, overhang, awning, or other structure
 - 3) Applications around potential pest entry points into buildings, when limited to a surface band not to exceed one inch in width.

USE INFORMATION: Precor® 2625 Premise Spray (Precor® 2625) provides effective kill of listed pests in and on buildings and structures and their immediate surroundings and on modes of transport. Permitted areas of use: apartment buildings, residential homes, garages, kennels, on pet bedding, furniture, and other inanimate objects infested with fleas, out buildings, barns, hospitals, and the non-food/feed areas of hotels, motels, commercial, industrial or office buildings, laboratories, mausoleums, nursing homes, private residences, schools, veterinary clinics, stores, utilities, warehouses, and in non-food areas of restaurants, food manufacturing, processing, and servicing establishments, and on transportation equipment: vessels, rail cars, aircraft (do not use in aircraft cabins), buses, trucks and trailers. Precor®, the Insect Growth Regulator ingredient in

Precor® 2625 provides 7 months' protection by preventing flea eggs from ever developing into biting fleas.

INDOORS: Hold container with nozzle pointed away from you. Can be used as a surface or spot, crack and crevice, or void treatment. For application as a crack and crevice spray, spray at a rate of 2 seconds per linear foot. For application as a spot spray, treat surface until slightly wet. The 360° valve allows the product to be sprayed upright or upside down to facilitate applications. Do not reapply more often than every 14 days.

IMPORTANT: Keep people and pets out of areas during treatment. Do not apply directly to pets or animals. Vacate room after treatment, and ventilate until surfaces are dry before reoccupying. To eliminate fleas/ticks on your pets, use only products approved for such uses.

For Flea Infestations, Precor® 2625 treats 2625 sq ft. To treat carpet and other areas of suspected flea infestation, hold container upside down 2-3 feet from surface, point actuator towards the surface and push button. Using a sweeping motion, apply a light uniform spray to all surfaces of furniture, rugs, carpets, drapes, and on and around all pet resting areas. Apply to infested areas such as pet beds and pet resting quarters, nearby cracks and crevices, under the edges of rugs and floor coverings, between and under cushions of upholstered furniture and other areas where fleas may be present. A light misting is all that is required to control fleas and flea larvae. Use care when applying to hardwood floors and only use a light misting to those areas. Reapply in 14 days, if necessary.

Fleas in Buildings: Precor® 2625 is generally non-staining, however, in questionable locations, test in an inconspicuous area before treating. Cover and unplug aquariums before spraying.

Ticks: Apply to carpet or flooring, target areas at base, lower, and upper wall areas as needed at a rate of 1 ounce per 125 square feet. Thoroughly treat pet resting areas such as furniture and carpeted areas. Use care when applying to hardwood floors and only use a light misting to those areas.

To kill Cockroaches, Ants (excluding Pharaoh and Harvester Ants), Brown Marmot Stink Bugs, Asian Lady Beetles, Crickets, Earwigs, Firebrats, Fleas, Silverfish, Spiders, Sowbugs and Ticks: Apply as a crack and crevice, void or spot treatment in areas where these pests crawl and hide, especially on hidden surfaces around sinks and storage areas, along and behind baseboards, around doors and windows, behind and under refrigerators, cabinets, sinks and stoves, and on the underside of shelves, drawers, bookcases and other areas where pests are seen.

Ants: (excluding Pharaoh and Harvester Ants) Spray around ant trails and mounds, doors and windows and other places where ants enter premises. Spray around nests hidden under steps, brickwork, concrete, landscape material, retaining walls, etc. Break apart accessible nests and spray on and around debris.

Bed Bugs – Thoroughly inspect areas of suspected bed bug infestation and note potential harborage sites or actual infestations. Precor® 2625 kills bed bugs and their eggs.

Apply on mattresses as a spot treatment to mattress seams, edges, and tufts of bed only. Focus applications on seams and folds. Do

not use on pillows, bed linens or clothes. Do not treat entire surface area of mattress. Allow mattress to dry thoroughly before replacing pillows and/or bed linens.

Bed bugs may also harbor in areas of the room away from the bed. Apply as a broadcast, crack and crevice, void, or spot application where evidence of bed bugs occurs. This includes bed frames, box springs, inside empty drawers and clothes closets, night stands, floors around the bed, and other furniture in the room, carpet edges, high and low wall moldings (such as floor molding or window casings), wall voids, behind wall hangings and mirrors, wallpaper edges and popcorn ceilings. Remove all clothes and other articles from dressers or closets before application. Take bed apart. Treat joints and channels if hollow, such as square or round tubing, and see that interior framework is treated. Apply as a surface application to carpeting, drapes, and flooring at the rate of 21 ounces per 656 ft². Allow all treated areas to dry thoroughly before use. If evidence of bed bugs is found in/on mattresses, use products approved for full coverage.

House Dust Mites: Apply as a surface application to carpeting, drapes, inside and on box springs, under beds, and flooring or other harborage sites at the rate of 21 ounces per 656 ft². Precor® 2625 may be applied as a spot treatment to mattress seams, edges, and tufts of bed only. Focus applications on seams and folds. Do not use on pillows, bed linens or clothes. Do not treat entire surface area of mattress. Allow mattress to dry thoroughly before replacing bedding.

Wasps and Yellow Jackets: Apply as a crack and crevice or void application. Apply in indoor locations such as attics, steeples, mechanical rooms, barns, sheds, non-food/non-feed warehouses, garages, and carports, or in walls. Spray into crack, crevice or void areas until thoroughly wet.

Spiders (including Brown Recluse and Black Widow): Apply along voids and behind baseboards, to window and door frames, corners, pipes, storage localities, attics, crawl spaces and other areas over which these pests may crawl.

Earwigs, Flies, Mole Crickets, Pillbugs, and Sowbugs: Apply around doors and windows and other places where these pests may enter premises. Treat baseboards, storage areas and other locations where these pests are found.

Pantry Pests - Exposed Stages of Saw-toothed Grain Beetles, Flour Beetles (Red and Confused), and Cigarette Beetles: Treat exposed stages. Remove all foodstuffs, utensils and shelf paper from area to be treated. Discard used shelf paper and any infested foodstuffs. Apply spray to shelves and in cracks and crevices behind and under cupboards and cabinets. Allow spray to dry prior to replacement of

shelf paper, food and utensils.

Carpet Beetles (Black, Furniture and Varied): Spray on and under edges of floor coverings, under rugs and furniture and in closets or other localities where these insects are found.

OUTDOORS: Point spray nozzle away from face. Hold can on slight downward angle. For best results, spray when air is calm. Spray with wind if breeze is blowing.

PESTS ON OUTSIDE SURFACES OF BUILDINGS – To kill Ants (including Carpenter Ants) (except Pharaoh and Harvester Ants), Cockroaches, Brown Marmot Stink Bugs, Asian Lady Beetles, Crickets, Earwigs, Flies and Sowbugs (Pillbugs): Spray pests directly or spray foundation of buildings where insects are active and may find entrance up to a height of 2 to 3 feet and 2 to 3 feet out. For ants, spray around nests hidden under steps, brickwork, concrete, etc. Break apart accessible nests and spray on and around debris. Precor® 2625 may be applied as a spot, crack and crevice, or void treatment to outside surfaces. Do not apply as a broadcast spray. Spray outside surfaces of buildings where insects tend to congregate. Spray areas include (but are not limited to) screens, window frames, eaves, porches, patios, garages and refuse dumps. Repeat treatment as necessary but not more than once per week.

TO KILL WASPS AND YELLOW JACKETS under eaves, screens, window frames, doors, patios, cracks, holes or crevices wherever insects are noticed, spray for about 1 -2 seconds or until surfaces are moist. To prevent entrance of insects into the house, spray around points where insects enter such as outside plumbing, faucets, etc., and cracks or crevices in foundation up to a maximum height of 3 feet, as well as along sills and ledges.

For best results, spray in early morning or late evening when insect activity is minimal. Stand a safe distance from nest and not directly underneath. Hold can upright and point spray opening toward nest with wind at your back. Spray until nest is thoroughly saturated to kill the entire nest population. Wait at least 24 hours before removing the nest.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Do not store near heat or open flame. Store in a cool, dry (preferably locked) area that is inaccessible to children and animals.

PESTICIDE DISPOSAL AND CONTAINER HANDLING: Do Not Puncture or Incinerate! **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions.

Central Garden & Pet Company, 1501 East Woodfield Road, 200W, Schaumburg, Illinois 60173
